Integra Fire Alarm Paging

LRS
Long Range Systems
UK OFFICES

The new Integra fire alarm paging system from Long Range Systems UK is a breakthrough in cost-performance for where fire is involved. As a manufacturer LRS technology has revolutionised over 40 different industries and is set to change the way you think about paging in the fire safety arena. Features of the Integra include:

* Alerts staff when an alarm is triggered immediately by location so that triggers can be identified and cancelled if false positive.
* Can notify the deaf & hearing impaired in the event of fire via pagers
* Helps compliance with the DDA
* Visual AND vibrating alert via LRS alphanumeric pagers*
* Compatible with ALL fire alarm control panels
* Simple to install   * Powered by existing fire panel PSU
* Expandable to cover any size of building
*4 programmable inputs (Fire, Fault, NC,NO) per transmitter
* Adheres to BS5839 Part 1:2013
* Self contained unit available with EN54-4 Approved PSU and battery condition monitoring
* Loop activated and monitored version available
* Full UK support from manufacturers offices
