Rechargeable Alphanumeric Staff Pager

The Rechargeable alphanumeric one line pager for staff and management is designed to allow communications in text rather than simple buzzer or flashing light solutions. Text changes everything when it comes down to complete understanding of what your message is and there is little room for mis-interpretation of your instructions.

This unit has a very simple but extremely robust and has just one operating button. Simplicity enables ease of use and often with other products they could simply end up in the cupboard because staff cannot grasp how to use them. This is not so with our rechargeable alpha pager.

The LRS rechargeable alpha pager is recharged from one 8 hour charge it can last for up to 48 hours.

This unit has been tried and tested in [industry](#) for years. And with 5 of the last messages stored on board this unit has seen a large uptake in many businesses including [Health and Safety](#) here in the UK.

On site reprogramming and massive messages of up to 200 characters are stand out features.
